

The art of inspiration

BEVERIDGE students are sculpting the future development of their town.

Nine students from Beveridge Primary School sculpted and painted pieces that reflected their favourite thing about the area as part of a project sponsored by the Mandalay residential development at Beveridge, north of Craigieburn.

Year 6 student Zoe, 11, (pictured) has lived in Beveridge for 10 years. She made a kangaroo to reflect her early memories of animals gathering around the main roads. "I love playing with clay and getting my hands dirty," she said.

Principal Steven Fernando said the project had boosted enthusiasm in the arts.

"It's great that the students can draw inspiration from the community around them and create a piece of art that reflects their own town and influences," he said.
